Signals in cellular automata

- Signal (meta-signal)
- Collision (rule)

Vocabulary and example: find the middle

M |

M |

Meta-signals (speed)

M (0)

Collision rules

Vocabulary and example: find the middle

div  M |

M |

Meta-signals (speed)

M	(0)
div	(3)

Collision rules

Vocabulary and example: find the middle

Meta-signals (speed)

M	(0)
div	(3)
hi	(1)
lo	(3)

Collision rules

$$\{ \text{div}, M \} \rightarrow \{ M, \text{hi}, \text{lo} \}$$

Vocabulary and example: find the middle

Meta-signals (speed)

M	(0)
div	(3)
hi	(1)
lo	(3)
back	(-3)

Collision rules

$$\{ \text{div}, M \} \rightarrow \{ M, \text{hi}, \text{lo} \}$$

$$\{ \text{lo}, M \} \rightarrow \{ \text{back}, M \}$$

Vocabulary and example: find the middle

Meta-signals (speed)

M	(0)
div	(3)
hi	(1)
lo	(3)
back	(-3)

Collision rules

$$\{ \text{div}, M \} \rightarrow \{ M, \text{hi}, \text{lo} \}$$

$$\{ \text{lo}, M \} \rightarrow \{ \text{back}, M \}$$

$$\{ \text{hi}, \text{back} \} \rightarrow \{ M \}$$

Simple cases

2 speeds or less

1 or 2 speeds

1 speed

No collision at all

2 speeds

Bounded number of collisions

- No accumulation
- Not Turing-universal

Simple cases

4 speeds or more

Rational case (\mathbb{Q})

- Rational speed
- Rational initial positions

↪ Collisions at rational positions
as the solution of systems of two rational linear equations

Implemented in Java

- Exact precision (on \mathbb{Q})
- Tons of space-time diagrams

3 speeds

Rational (numbers) case (\mathbb{Q})

Rational space-time diagrams

Embedded in a mesh

- Some gcd computations [Becker et al., 2013]
- Embedded in a mesh [Becker et al., 2013, Durand-Lose, 2013]

Mesh

Results

- No accumulation [Becker et al., 2013]
- No computation [Durand-Lose, 2013]

 - 2 speeds or less
 - 4 speeds or more
- 4 3 speeds
 - Rational (numbers) case (\mathbb{Q})
 - Irrational accumulating case
 - Irrational computing case
- 5 Results and future work

Results

Rational signal machines

- Up to *normalization* (\rightsquigarrow rational ratios)
- At least 4 speeds to accumulate or compute

With an irrational ratio between initial distances

- 3 (rational) speeds are enough to accumulate and compute
- Turing-universal 25-meta-signal 3-speed signal machine with the Golden ratio

With an irrational ratio between speeds

- Can be used to get an irrational ratio between distances
- 3 (rational) speeds are enough both to accumulate and compute

Future work

- Use irrational values as oracle
- Black hole (hyper-)computation
- Analog computation?
