

## UNBLND:

Students built the Dashboard for community manager, with a pilot focus on:

- Community Space: Blended mobility students
- Community Space for Youth Climate Leaders
- Community Space: Loneliness in student cities / amongst students
- Community Space: Erasmus students

...

This dashboard should also be useful for potential other B2B partners

----

Current functionality:

Switch between different (closed) communities (frontend)

----

Functions to build:

Generic admin dashboard: spaces.unblnd.com (doesn't exist)

Functionality: React - JavaScript framework

A frame is indicated (minimum project)

Must be usable for brands, companies, organizations, ...

Moderation

Management roles: management by Prof, students, ... (Who?)

Minimal functionality (design)

...

Developing specific features for your own Space within the App UNBLND

Functionality: ReactNative - JavaScript framework

e.g. Anonymous brainstorm

e.g. AI Motion Game (in-real-life validations)

eg...

Network (back end)

unblnd.com/api (exists, connects to app)

AWS environment: exists for web and api (docker)

Scaleway: setting up a new environment for AI modules in European Cloud environment (python)

IT

App Dev: ReactNative, visual studio code, GitHubWeb Dev: React, visual studio code, GitHubAI/Cloud Dev: Python, hugging face, Scaleway/AWS, master Recommender Systems
