SÉMINAIRE

Dr. German Amador Diaz

Universidad Técnica Federico Santa María- Valparaíso , Chile

ORGANISÉ(E) par le labex CAPRYSES

Hydrogen and ammonia, research, challenges and opportunities in Chile

A short presentation to present the governmental policies to boost the hydrogen industry in Chile, ongoing research projects, and the main results

The research interests of Pr. Diaz are focused on chemical kinetics, pollutant emissions, biomass gasification, the use and characterization of alternative fuels, and the study of abnormal combustion in internal combustion engines. He is expert in different areas related to sustainable transport (electromobility), dual-fuel engines (LPG and H₂), and recently in the measurement of pollutant emission in real driving conditions.
