

SUPPORT FOR RESEARCH

 **The Projects, Research & Innovation Center is here to guide you**

Since 2023, the Project, Research & Innovation Center (*Pôle APRI*) has streamlined its services to better support research projects at the University of Orléans. This reorganization aims to simplify procedures, facilitate access to funding, and improve the promotion of research work.

[Learn more about our missions](#) 

- A. Research and laboratory administration
- B. Doctoral studies and training
- C. Support for project development**
- D. Project management
- E. Valorization
- F. Innovation

 **Updated researcher charter and codes** 

1

Researchers are encouraged to promote cooperation and partnerships between universities, businesses, and other societal actors.

2

Researchers must take part in all aspects of open science and be supported by their employers.

3

Researchers must adopt safe working methods that comply with legislation and be aware of current data protection requirements.

Focus on...

C. Support for project development

The University of Orléans and the CNRS have pooled their research support services within the Grand Campus Partnership and Promotion Service (SPVGC):

- The Call for Projects, Industrial Partnerships, and Commercialization Center (**APPIV**) assists teacher-researchers in preparing responses to calls for research projects, collaboration agreements, commercialization agreements, and industrial contracts.

Contact: dr08.liste.spv.gc.appiv@cnrs.fr

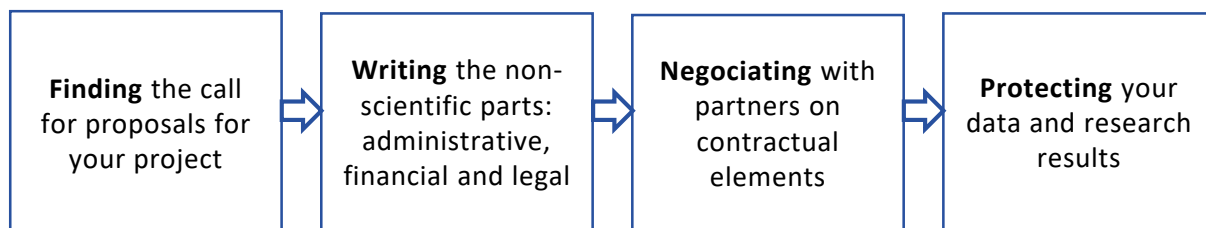

- The Shared Unit « Research Europe » (**CMER**), a joint structure with the University of Tours and the INSA CVL, guides teacher-researchers in the development of their European projects within the framework of Horizon Europe.

Contact: europe.proposal@univ-orleans.fr

Tailored support: from the initial idea to the research contract signing

Information point

1

The University of Orléans will soon launch **OSCAR**, an organization and follow-up tool for research and contract activities.

2

An **Open Science Charter** was recently created at the University of Orléans to promote and supervise open science practices within our institution.

3

Although the University's data protection policy is still being defined, a **Charter on the use of Artificial Intelligence (AI)** has already been implemented.
